Three World Meet Test Review

Label the Native American Regions and understand that regions were divided by geographical factors such as landforms, climate, and environment.

Label the African Regions and understand that regions were divided by geographical factors such as landforms, climate, and environment.

Eastern Woodlands:

- Climate played a great effect in farming in this region.

- The variety in climates resulted in longer growing seasons in the south, and shorter growing seasons in the north.

- Forests and rivers were a constant geographical feature in this region despite its size.

- The Iroquois Native Americans had an organized form of government called a confederation.
